

## PARTS OF A PLANT - ACTIVITY SHEET

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Grade: \_\_\_\_\_

A plant has many parts that each serve a different purpose:

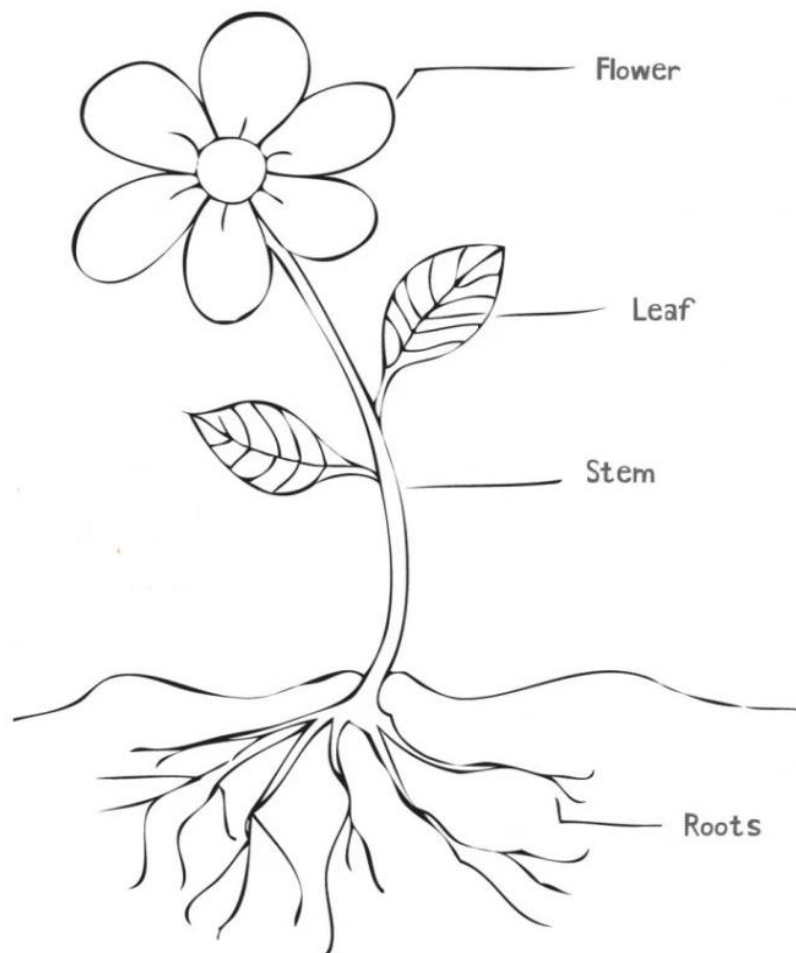

The **seed** is the beginning of a new plant.

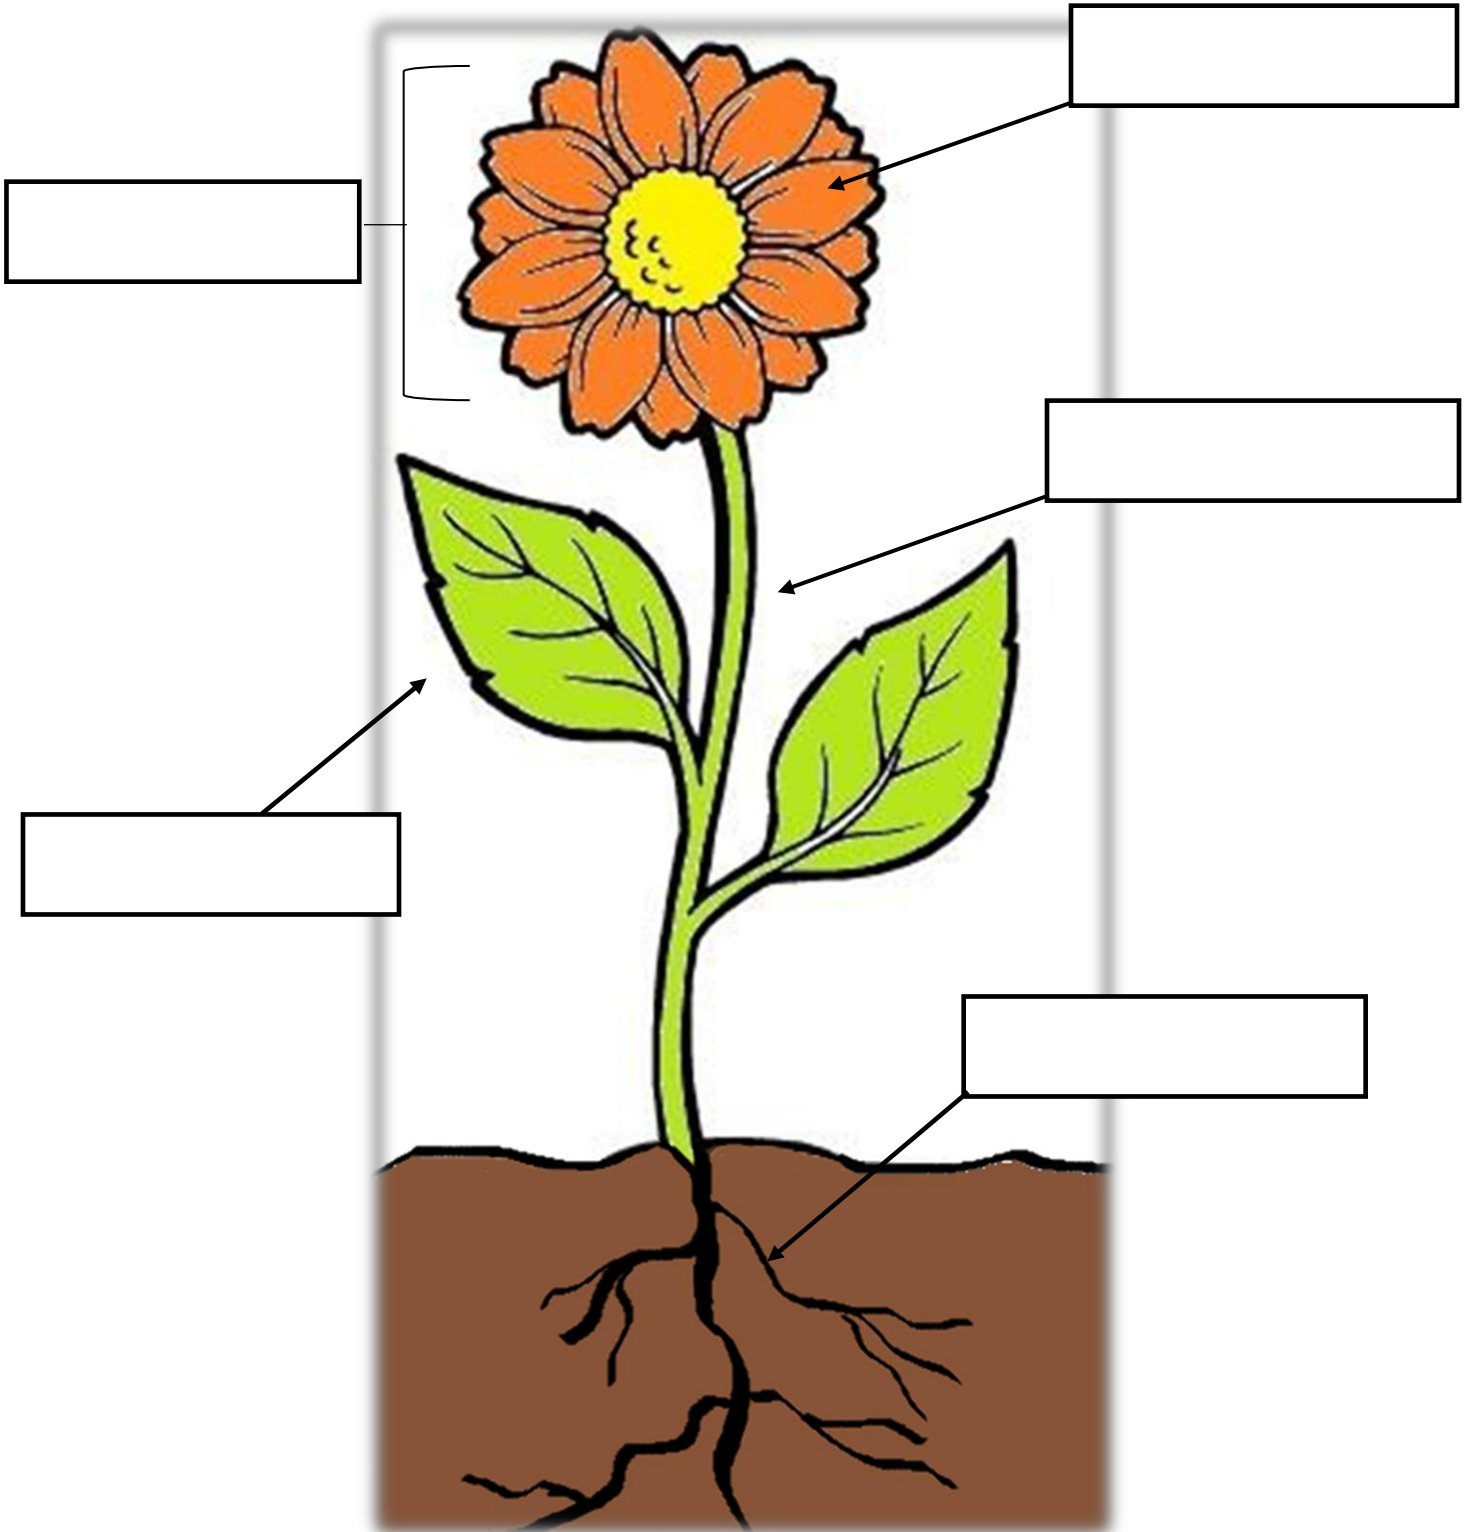

The **roots** grow out of the seed. The roots hold the plant in the soil and absorb nutrients and water.

The **stem** carries water from the roots to the other parts of the plant. The stem also holds up the plant's leaves and flowers.

The **leaves** take in sunlight and turn it into food for the plant.

The **flower** makes seeds that grow new plants. The **petals** of the flower are brightly colored to attract insects that help make the seeds.

stem   petal   roots   flower   leaf
